

An Aspen summer is like no other. The days are filled with sunshine, the evening skies are studded with stars, and the night air is cool enough to savor a toasty bonfire. Challenge Autism has created highly structured summer camps for the outdoor adventurer with ASD in your family. Our weeklong camps provide the perfect setting, a staff extensively trained in working with those on the spectrum, and a community where they are free to create memories. Athletes/campers will build skills in sports, communication, daily living, and overall independence.
